

E-DETECTIVES WEBSITE DEVELOPMENT BRIEF

1. Project Title

Development of a New Corporate Website for E-Detectives

2. Project Purpose

E-Detectives requires a new website that is professional, credible, modern, and conversion-focused. The website must position the company as a trusted specialist in **corporate investigations, digital forensics, cybersecurity, incident response, security operations, verification, and compliance support**.

This is not meant to be just an online brochure. The website must function as a **trust-building and business development tool** that helps potential clients quickly understand our capabilities, feel confident in our professionalism, and take action to engage us.

3. Primary Website Objectives

The website must achieve the following:

3.1 Build Trust Immediately

Visitors must quickly feel that E-Detectives is:

- credible
- discreet
- professional
- experienced
- capable of handling sensitive matters

3.2 Clearly Explain What We Do

Our services span investigations, digital forensics, cybersecurity, SOC support, verification, and compliance. The website must explain these clearly and in business language.

3.3 Generate Enquiries and Consultations

The website should convert visitors into leads through:

- contact forms
- WhatsApp contact
- phone calls
- consultation requests

3.4 Support Premium Positioning

The business should not appear generic, cheap, informal, or overly technical. It must look like a serious, specialist firm serving corporate and institutional clients.

4. Company Overview

Company Name: E-Detectives

Location: Botswana

Business Nature: Specialist investigations, digital forensics, cybersecurity, incident response, security operations, vetting, verification, and compliance support.

Core positioning

E-Detectives is a trusted partner for organisations that require support in:

- uncovering fraud and misconduct
- preserving and analysing digital evidence
- responding to cyber incidents
- strengthening security posture
- improving risk visibility
- conducting due diligence and verification

Important note

We no longer offer person tracing services, and this should not appear on the website.

5. Target Audience

The website should primarily speak to the following audiences:

Primary audiences

- Corporate organisations

- Banks and financial institutions
- Insurance companies
- Mining companies
- Government entities
- Regulators
- Law firms
- SMEs

Secondary audiences

- CEOs and directors
 - internal audit teams
 - risk and compliance teams
 - HR departments
 - legal departments
 - procurement teams
 - ICT management
-

6. Brand and Tone Direction

The website tone and visual style should be:

- professional
- corporate
- discreet
- modern
- trustworthy
- authoritative
- clear
- security-conscious

The site should feel like:

- “These people can be trusted with sensitive matters.”
- “These people know what they are doing.”
- “These people are serious, structured, and capable.”
- “These people understand both investigations and technology.”

Avoid:

- playful design
- gimmicky animations
- hacker clichés

- cheap stock visuals
 - excessive jargon
 - crowded layouts
 - too many colors
 - anything that makes the firm look informal or amateur
-

7. Core Website Message

The website must communicate the following overall message:

E-Detectives is a discreet, credible, highly capable investigations, digital forensics, cybersecurity, and SOC partner that organisations can trust with sensitive matters.

8. Core Service Areas to be Reflected on the Website

The website should prominently present the following service lines:

1. **Corporate Investigations**
 2. **Digital Forensics**
 3. **Cybersecurity Services**
 4. **Incident Response & Recovery**
 5. **Security Operations Centre (SOC) / Managed Monitoring**
 6. **Vetting, Verification & Due Diligence**
 7. **Data Protection & Compliance Support**
 8. **Training & Awareness**
-

9. Solutions / Products to Feature

In addition to services, the website should create room for named solutions and productized offerings, including:

- **ScamDetect**
- **IRRaaS** – Incident Response and Recovery as a Service
- **VIaaS** – Verification and Investigation as a Service
- **SOC / Managed Monitoring Support**

This distinction is important because it helps position E-Detectives as both a service provider and a solutions-driven company.

10. Sitemap / Required Pages

The recommended website structure is as follows:

1. Home
2. About Us
3. Services Overview
4. Corporate Investigations
5. Digital Forensics
6. Cybersecurity Services
7. Incident Response & Recovery
8. Security Operations Centre (SOC)
9. Vetting, Verification & Due Diligence
10. Data Protection & Compliance Support
11. Training & Awareness
12. Solutions / Products
13. Industries Served
14. Case Studies / Experience
15. Insights / Blog
16. Contact

11. PAGE-BY-PAGE CONTENT OUTLINE

11.1 HOME PAGE

Goal

Make a strong first impression, build trust quickly, explain what E-Detectives does, and drive contact.

Required sections

A. Hero Section

Must immediately communicate:

- who we are
- what we do
- why clients should trust us

Suggested headline direction:

- Corporate Investigations, Digital Forensics & Cybersecurity Services You Can Trust
- Discreet Investigations. Digital Evidence. Cybersecurity That Protects Business
- When Fraud, Misconduct or Cyber Threats Arise, We Help You Find the Truth

Supporting copy direction:

E-Detectives helps organisations investigate fraud, analyse digital evidence, respond to cyber incidents, improve security visibility, and handle sensitive risk matters with professionalism and discretion.

CTAs:

- Request a Confidential Consultation
 - Speak to an Expert
 - Explore Our Services
-

B. Trust / Credibility Strip

This section should highlight quick trust signals such as:

- trusted across corporate and institutional environments
 - investigations + forensics + cybersecurity capability
 - confidentiality-first approach
 - Botswana-based specialist support
 - evidence-driven reporting
-

C. About Summary

Short company introduction explaining who E-Detectives is and what kind of work it does.

D. Core Services Overview

Visual service blocks for:

- Corporate Investigations
- Digital Forensics
- Cybersecurity
- Incident Response
- SOC / Managed Monitoring

- Verification & Due Diligence
- Data Protection & Compliance
- Training

Each should link to a dedicated page.

E. Featured Solutions

Highlight:

- ScamDetect
 - IRRaaS
 - VIaaS
 - SOC / Managed Monitoring
-

F. Why Clients Choose Us

Short section with value statements such as:

- Discreet handling of sensitive matters
 - Multi-disciplinary expertise
 - Evidence-based work
 - Clear reporting and practical recommendations
 - Responsive and professional engagement
-

G. Industries Served

Short sector blocks for:

- Banking & Financial Services
 - Insurance
 - Mining
 - Government & Regulators
 - Legal & Professional Services
 - SMEs & Corporate
-

H. How We Work

Simple 4-step process:

1. Confidential consultation
 2. Scoping and risk assessment
 3. Investigation / technical engagement
 4. Reporting and recommendations
-

I. Experience / Capability Highlights

Anonymised examples of work handled:

- fraud investigations
 - cyber incident investigations
 - digital forensic reviews
 - verification support
 - vulnerability assessments
 - monitoring and response support
-

J. Final CTA

Strong call to action:

- Book a Consultation
 - WhatsApp Us
 - Contact Us
-

11.2 ABOUT US PAGE

Goal

Explain who E-Detectives is, what it stands for, and why clients can trust it.

Required sections

- Company overview
- Mission
- Vision
- Our story
- Our values

- Leadership / founder profile
- Why our approach works

Key content points

- specialist firm, not general IT support
 - investigations + forensics + cybersecurity combination
 - professionalism and discretion
 - practical, evidence-based work
 - ability to communicate with both technical and executive audiences
-

11.3 SERVICES OVERVIEW PAGE

Goal

Present all services in one structured location and guide visitors to the right specialist page.

Required content

Short intro paragraph followed by service blocks linking to:

- Corporate Investigations
 - Digital Forensics
 - Cybersecurity Services
 - Incident Response & Recovery
 - Security Operations Centre (SOC)
 - Vetting, Verification & Due Diligence
 - Data Protection & Compliance Support
 - Training & Awareness
-

11.4 CORPORATE INVESTIGATIONS PAGE

Goal

Position E-Detectives as a serious provider of investigation services for internal and external corporate matters.

Required sections

- What corporate investigations involve
- What we help investigate

- Who this is for
- Our approach
- Typical deliverables
- CTA

What we help investigate

- internal fraud
- misconduct
- conflict of interest
- procurement irregularities
- corruption-related concerns
- suspicious transactions
- policy breaches
- internal allegations
- asset misuse

Deliverables

- investigation reports
 - interview summaries
 - evidence schedules
 - findings and recommendations
-

11.5 DIGITAL FORENSICS PAGE

Goal

Show technical capability in preserving, extracting, reviewing, and reporting on digital evidence.

Required sections

- What digital forensics is
- Areas covered
- Use cases
- Why proper forensics matters
- Typical deliverables
- CTA

Areas covered

- computer forensics
- mobile device forensics

- email forensics
- log analysis
- forensic imaging
- deleted data recovery
- activity timelines
- evidence preservation

Use cases

- internal investigations
- litigation support
- cyber incidents
- suspicious employee activity
- unauthorised access concerns
- data theft concerns

11.6 CYBERSECURITY SERVICES PAGE

Goal

Present cybersecurity as a risk management and business protection service.

Required sections

- Intro
- Services included
- common client problems
- outcomes and value
- CTA

Services included

- vulnerability assessments
- penetration testing
- security reviews
- cyber risk assessments
- security architecture guidance
- hardening support
- awareness training
- security improvement support

Outcomes

- identified risks
 - prioritized vulnerabilities
 - remediation guidance
 - improved visibility
 - stronger security posture
-

11.7 INCIDENT RESPONSE & RECOVERY PAGE

Goal

Show that E-Detectives can support organisations during cyber incidents and other suspicious digital events.

Required sections

- Intro
- situations handled
- response focus
- why speed and structure matter
- featured solution: IRRaaS
- CTA

Situations handled

- email compromise
- suspicious user activity
- system compromise
- insider threat concerns
- data breach support
- ransomware-related response support
- evidence preservation after incidents

Response focus

- containment guidance
 - evidence preservation
 - forensic review
 - root cause support
 - reporting
 - remediation recommendations
-

11.8 SECURITY OPERATIONS CENTRE (SOC) PAGE

Goal

Position E-Detectives as a provider of ongoing security visibility, monitoring support, escalation support, and operational cyber maturity.

Required sections

- Intro
- what the SOC covers
- client value
- SOC-related services
- ideal client types
- workflow / visual explanation
- CTA

What the SOC covers

- security monitoring support
- alert triage
- incident escalation
- visibility into suspicious activity
- threat intelligence integration
- managed monitoring support
- support for improving security operations maturity

Client value

- improved threat visibility
- earlier detection
- faster escalation
- structured response support
- support where the client lacks a full internal SOC

This page is important because it strengthens long-term positioning and recurring service opportunities.

11.9 VETTING, VERIFICATION & DUE DILIGENCE PAGE

Goal

Position this as a business trust and risk-reduction service.

Required sections

- Intro
- services included
- who uses this service
- product link to VIaaS
- CTA

Services included

- document verification
- background verification
- supplier vetting
- third-party due diligence
- legitimacy checks
- investigative verification support

Typical users

- insurers
- corporate procurement teams
- legal firms
- financial institutions
- high-risk transaction environments

11.10 DATA PROTECTION & COMPLIANCE SUPPORT PAGE

Goal

Show that E-Detectives helps organisations improve practical compliance and reduce governance risk.

Required sections

- Intro
- services included
- why it matters
- CTA

Services included

- data protection assessments
 - compliance reviews
 - awareness training
 - policy and process support
 - control gap identification
 - risk-based recommendations
-

11.11 TRAINING & AWARENESS PAGE

Goal

Show expertise, support lead generation, and provide a softer entry point for prospective clients.

Required sections

- Intro
- training topics
- target audiences
- delivery formats
- CTA

Training topics

- cyber awareness
 - scam and fraud awareness
 - phishing awareness
 - data protection awareness
 - digital evidence handling
 - executive awareness sessions
 - tailored corporate workshops
-

11.12 SOLUTIONS / PRODUCTS PAGE

Goal

Present E-Detectives as a solutions-driven company, not only a professional services firm.

Required sections

- Intro
- ScamDetect

- IRaaS
- VaaS
- SOC / Managed Monitoring
- CTA

Purpose

This page should make it clear that the company offers structured, repeatable, scalable solutions in addition to bespoke engagements.

11.13 INDUSTRIES SERVED PAGE

Goal

Help visitors self-identify and feel understood.

Required sectors

- Banking & Financial Services
- Insurance
- Mining
- Government & Regulators
- Legal & Professional Services
- SMEs & Corporate Enterprises

Each sector block should briefly explain the typical risk, fraud, security, or compliance issues faced in that environment.

11.14 CASE STUDIES / EXPERIENCE PAGE

Goal

Build trust using anonymised, professional examples.

Required format

Each case example should include:

- client challenge
- our role
- work performed

- value delivered / outcome

Possible examples

- internal fraud investigation
- cyber incident investigation
- digital forensic review
- verification / due diligence assignment
- vulnerability assessment engagement
- SOC or monitoring support engagement

No confidential details should be exposed.

11.15 INSIGHTS / BLOG PAGE

Goal

Support authority, trust, and search visibility.

Content themes

- fraud prevention
- cyber risks
- scam trends
- digital evidence
- insider threats
- compliance issues
- data protection
- security operations
- incident response lessons

This page should be built so that articles can be added easily over time.

11.16 CONTACT PAGE

Goal

Make contacting E-Detectives simple and immediate.

Required sections

- contact headline
- phone, email, WhatsApp
- office location
- business hours
- short enquiry form
- confidentiality reassurance

Enquiry form fields

- Name
- Company
- Phone / Email
- Service Needed
- Brief Message

Suggested dropdown options

- Corporate Investigations
 - Digital Forensics
 - Cybersecurity
 - Incident Response
 - SOC / Monitoring
 - Verification / Due Diligence
 - Training
 - Compliance Support
 - Other
-

12. CTA MAP

The site should use clear calls to action throughout, not only on the Contact page.

Primary CTAs

- Request a Confidential Consultation
- Speak to an Expert
- Contact Us
- Book a Consultation

Secondary CTAs

- Explore Our Services
- Learn More

- View Solutions
- Read More

Urgent / response CTAs

- Report an Incident
- Request Urgent Support

Contact convenience CTAs

- WhatsApp Us
- Call Now

Every service page should end with a CTA.

13. TRUST SIGNALS TO INCLUDE

The website should visibly reinforce:

- confidentiality
- evidence-based work
- professional reporting
- specialist capability
- corporate and institutional relevance
- investigations + forensics + cyber expertise under one firm

Possible trust assets

- years of experience
 - founder / leadership credentials
 - certifications
 - sectors served
 - anonymised case examples
 - product / solution maturity
 - quality office / lab / SOC photography
 - professional client-facing copy
-

14. DESIGN REQUIREMENTS

Desired look and feel

- premium corporate
- clean and modern
- elegant but not flashy
- security-oriented
- professional and structured

Visual direction

- real images preferred over generic stock
- professional icons
- strong spacing
- clean typography
- subtle motion only where appropriate

Must avoid

- green code effects
- cliché hacker visuals
- low-quality graphics
- cluttered layouts
- inconsistent styling
- cartoonish elements

15. FUNCTIONAL REQUIREMENTS

The website should include:

- fully responsive design
- fast loading speed
- contact forms
- WhatsApp integration
- click-to-call on mobile
- CMS/admin panel for content updates
- blog capability
- SEO-ready page structure
- SSL support
- social links
- analytics integration
- search console readiness
- backup support

- security hardening basics

Optional but valuable:

- downloadable company profile
 - consultation request form
 - newsletter form
 - live chat
-

16. SEO REQUIREMENTS

The website should be structured for search visibility around terms such as:

- corporate investigations Botswana
- digital forensics Botswana
- cybersecurity Botswana
- incident response Botswana
- fraud investigations Botswana
- supplier vetting Botswana
- due diligence Botswana
- vulnerability assessment Botswana
- penetration testing Botswana
- SOC Botswana

Technical SEO requirements:

- clean URLs
 - metadata for each page
 - proper heading structure
 - internal linking
 - mobile optimization
 - image optimization
 - page speed optimization
-

17. CONTENT / ASSETS REQUIRED FROM E-DETECTIVES

The developer should request the following from us:

- company logo
 - brand colors
 - company profile
 - founder / leadership bios
 - service descriptions
 - solutions / product descriptions
 - certifications
 - real office, forensic lab, and SOC images
 - contact details
 - WhatsApp number
 - social media links
 - anonymised case studies
 - testimonials if available
-

18. DEVELOPER DELIVERABLES EXPECTED

The developer should provide:

1. Proposed sitemap
 2. Homepage wireframe
 3. Design direction / moodboard
 4. Platform / CMS recommendation
 5. Mobile design approach
 6. SEO structure
 7. Security and maintenance approach
 8. Development timeline
 9. Content requirements list
 10. Testing and launch plan
-

19. SUCCESS CRITERIA

The website will be considered successful if it:

- looks credible and premium
- explains our services clearly
- makes visitors trust the company quickly
- showcases SOC and solutions effectively
- generates more enquiries

- supports proposals, presentations, and business development
 - reflects E-Detectives as a serious specialist firm
-

20. FINAL STRATEGIC NOTE FOR THE DEVELOPER

This website should not feel like a generic cyber company or a general consulting firm.

It must feel like a **high-trust specialist firm** that handles:

- sensitive investigations
- digital evidence
- serious cyber risk
- ongoing security operations support

The design, structure, and copy should work together to make a serious client think:

“These are the people we should call.”
